

SLIDE 1

OPENING:

I am deeply honored to represent the work of a phenomenal Team.

This is Team Lotus and I am Sailesh Rajanala, the team lead for Team Lotus.

My major is Computer science and my domain is UI/UX Development.

— — — Breathe Air — — —

Today, I would like to talk about three important things.

Firstly, I would like to talk about the project we are working on.

Next, I would like to showcase The very first prototype of our project.

Lastly, I would like to share some details about the basic testing of our prototype.

— — — Breathe Air — — —

Transition ->

Let's start by talking about the project we are working on

SLIDE 2

PROJECT

The project we are working on is Industry Partner Database.

— — — Breathe Air — — —

It involves the construction of a unified database that stores information about Community, Research, and Industry Partners which Senior Design Instructors contact to gather Inter-Disciplinary Senior Design Sponsored Projects.

— — — Breathe Air — — —

SLIDE 3

This project consists of three important parts.

1. A Webpage that takes in the input for the Database.
2. The Database itself.
3. A Webpage that gets the output from the Database.

All these three components will be stored in the university's web server.

Transition ->

Now without further any due, I would like to show you our very first prototype of our project.

SLIDE 4
